Day 2: Victoria Falls

The extraordinary Victoria Falls, located on the Zambia-Zimbabwe border are acknowledged as one of the natural wonders of the world. At the height of the rainy season, more than five hundred million cubic metres of water plunge over the wide basalt cliff edge every minute into a gorge over a hundred metres below.

This morning, set out on a walking tour of the Zimbabwean side of the Falls, accompanied by an expert guide who will explain their fascinating history as you pass through lush rainforest, stopping at spectacular viewpoints along the three-kilometre trail. Birdlife in the rainforest is abundant, and you are also likely to see bushbuck, monkeys, baboons and families of mongoose. After more stunning views of the falls, whose sheer basalt cliff extends over two kilometres, leading to its designation as the greatest curtain of falling water in the world, return to your iconic hotel.
